<https://www.linkedin.com/in/dineshtummakindi> | Aspiring Software Engineer

Education

B.Tech in Computer Science Engineering – Currently Pursuing

Diploma in Engineering – Completed

Technical Skills

- Programming: Python, JavaScript, C
- Core CS: Data Structures and Algorithms (DSA), DBMS
- Web Development: HTML, CSS, JavaScript, PHP
- Database: MySQL
- Tools/Concepts: Problem Solving, Algorithmic Thinking, Software Development Fundamentals

Projects

Online Healthcare Management System

- Built a full-stack healthcare web application using HTML, CSS, JavaScript, PHP, and MySQL to enable appointment booking, doctor-patient communication, and digital medical records.

Moto Shield Inbuilt Bike Accident Sensor System – Innovation Cell Project

- Developed a smart accident detection system integrated with a bike using sensor and microcontroller technology to detect crashes and trigger emergency alerts.

Current Focus

- Practicing Data Structures and Algorithms (DSA) for coding interviews
- Strengthening Python programming for problem solving and backend development
- Exploring Cybersecurity and Data Science for future specialization

Career Objective

Aspiring software engineer focused on building scalable software systems and solving real-world problems through strong programming, DSA, and modern development technologies.
